Essay on the importance of Education

When we talk about education; it is a life long process. Education encompasses the whole of everything, and it is not particularly related to teaching and learning but beyond that. The 21st century, an era where competition is at its peak comes the value of education. Education is the core value which opens door to many dimensions that we can't think of. When one has access to education, that person has the power to unlock future opportunities than others. Education plays a vital role in our human lives. It helps a person to think in more realistic approach and refine the person's behaviour and society. Education builds society more stronger than any other society which have less education. Education helps in broadening the mind of an individual. To have proper education is must for all the people.

One of the important aspect of education is that it can help us in getting white collar jobs and help us achieve greater heights and positions in near future. Education helps an individual and society to be more civilized. Proper education creates lots of ways to go ahead in the future. It makes us strong mentally, socially and intellectually. Infact, it is like a soul inside a human being. It helps us to achieve our aims and goals. Education is a means to an end. Education guarantees a better future and a brighter future ahead of an individual. Education is like a helm of a ship that steers the ships. Education also helps the individual to take a good and wise decision. An educated and well informed person is always one step ahead of others. Education shapes and moulds a person to be more wise in everything and helps in dealing any kind of situation that arises. Education also helps an individuals in learning other essential values like moral, good manners and wise ethics.

One of the most important factors of escaping poverty is education. Human mind is to be trained and without education a person is incomplete. Comparing with educated to uneducated people, they have less opportunity in everything. They can't read or write and hence less wisdom can be gained from other sources. Their life is limited only to certain areas, whereas person who have education is limitless in the spheres of life. They have wider knowledge in everything and are more advanced and more skilled than others

who aren't. Education is the key to any lock. Education is the pillar to success and is the foundation to any society. A developed nation is stronger and mightier than developing and under developed nations because of education. Education helps a person in bringing out new innovative ideas and changes in all the fields.

Education is very essential and hence government of India has given priority by inserting Articles in the constitution of India Under Art 21A (Right to Education), Art 29 & 30 (Cultural and Educational Rights) and Education in India comes under Concurrent List. Every year on 11th Nov, India celebrates National Education Day to commemorate the birth anniversary of India's First Education Minister Maulana Abul Kalam Azad for his immense contribution towards education in India. This shows that education is the life line of the country. Education is the key to healthy mind and successful life. Thus, the importance of education cannot be undermined.
